Ahmedabad, Gujarat, India Portfolio

Summary

IT Engineering student with hands-on experience in full-stack web development, backend development, databases, and data structures. Experienced in building web applications using JavaScript, React.js, Node.js, Express.js, Python, Flask, PostgreSQL, and MongoDB. Strong interest in software engineering, backend development, and building practical technology solutions.

Technical Skills

Languages: Java, Python, JavaScript, SQL
Frontend: HTML5, CSS3, Bootstrap, Tailwind CSS, React.js
Backend: Node.js, Express.js, Flask, REST APIs
Databases: PostgreSQL, MySQL, MongoDB
Tools: Git, GitHub, VS Code, Postman, pgAdmin
Core Concepts: Data Structures & Algorithms, OOP, DBMS, Authentication, API Integration

Projects

Ticket Tally – Smart IT Ticket Management System | *Flask, PostgreSQL, JavaScript, JWT* [GitHub](#) — [Live Demo](#)

- Developed an internal IT support ticket management system for creating, assigning, tracking, and resolving support requests.
- Implemented a Priority Queue-based ticket prioritization system to efficiently handle high-priority support requests.
- Built role-based dashboards for Employees, IT Staff, and Administrators with secure JWT authentication.
- Integrated email notifications, SLA tracking, PDF ticket generation, and automated ticket lifecycle management.

Civic Lens – AI-Powered Civic Issue Reporting Platform | *React, Django, DRF, FastAPI, PyTorch, MongoDB* [GitHub](#)

- Developed an AI-powered civic issue reporting platform that enables citizens to report infrastructure problems using geotagged photos and track their resolution through a public transparency dashboard.
- Implemented an ML pipeline using PyTorch and FastAPI to automatically classify issue category and severity, with low-confidence predictions routed to a manual review queue.
- Built two-stage duplicate detection using MongoDB 2dsphere geospatial queries, perceptual hashing, and CNN embedding similarity to automatically merge reports for the same issue.
- Implemented community-driven ticket verification, JWT-based authentication with RBAC, RESTful APIs, and an admin analytics dashboard for KPIs, trends, and ticket management.

Education

Bachelor of Engineering in Information Technology

Lok Jagruti (LJ) University

2024 – 2028

Ahmedabad, Gujarat

– **CGPA:** 9.33 / 10

– **Relevant Coursework:** Data Structures, DBMS, Object-Oriented Programming, Web Development, Computer Networks

Certifications

- **Inheritance and Data Structure in Java** – Coursera [Verify](#)
- **Exploratory Data Analysis for Machine Learning** – Coursera [Verify](#)
- **Lakshya 2.0 Hackathon Participation** – LD College

Additional Information

Interests: Full-Stack Development, Backend Engineering, Software Development, Data Structures & Algorithms
